

SUNDAY, JULY 21, 2024 – 6 AM WEATHER FORECAST

A touch more dew out there under slightly milder and more humid conditions this morning. Temps will bump into the low 70s before lunchtime before we slowly aim for the low 80s as the high temp. Clouds will generally increase this afternoon as that front falls apart to our north. This will influence a few pop ups to form just north of us and only a slight chance one reaches here. Any lingering chances this evening should decrease as we look for a calm and slightly cloudier night. A weak disturbance moving through the Ohio valley will try to extend a couple droplets here at Oakland Hills first thing Monday morning, otherwise anticipate another hit or miss shower/rumble chance mid to late afternoon. Temps will stay consistent right near the lower to mid 80s underneath this mix of clouds. These low chances last through Tuesday afternoon as our winds take on a more southwesterly push during the second half of the day. This is all ahead of the next system and cold front for Wednesday, bringing a higher risk for showers and storms for the afternoon and moreso evening hours of the day. Sharper southwest winds will turn northwest on Thursday following the front, bringing in much drier air and nicer weather late week.
