

### MONDAY, JULY 22, 2024 – 6 AM WEATHER FORECAST

Quite similar to yesterday with another mostly cloudy and slightly humid start. This cloud cover will continue throughout the day as a weak disturbance moves into the Ohio Valley, providing this slow warm up this afternoon. A couple weak showers may sneak in along southern Michigan, otherwise these low hit or miss chances for a shower or weak storm in the afternoon. Our clouds will shed a bit overnight, which may bring the low temp near 60 degrees again. Tuesday looks quite similar to Monday in hit or miss afternoon chances, otherwise do expect slightly warmer and breezier SW winds in the afternoon. A shower may squeak in our area Tuesday night ahead of the next approaching system, but we should see those rain/storm chances increase by lunchtime on Wed. The hotspot unfortunately looks between 1 - 5pm with bands of showers and storms widespread across the region. Gusty winds up near 20mph will blow with a more westerly hint late in the day as a cold front looks to swing east of us Wednesday night. Winds shift northwesterly and begin to pull drier air and improving weather late week. Temps will briefly cool down and feel chilly for the early mornings with the lower humidity.
