

TUESDAY, JULY 23, 2024 – 6 AM WEATHER FORECAST

Patchy fog and quite dewy conditions should lift as our bright and sunny skies take over this morning. A few clouds may mix in before those puffy cumulus filter in by lunchtime. Temps a touch warmer than yesterday, up near 86 degrees this afternoon. Expect the southwest winds start to breeze more in the afternoon and evening, gusting in the mid teens at times. Low isolated hit or miss chance late afternoon and evening with a better shot at something overnight. The approaching cold front is getting here quicker tomorrow with our shower/storm chances increasing by lunchtime through the afternoon. This will make our winds turn more westerly with a frontal passage later in the day. A leftover shower or sprinkle on Thursday, otherwise mainly sunshine and drier weather back on the menu. Expect some cooler/refreshing mornings and nights as that drier and cooler air seeps in across the region.
