

THURSDAY, AUGUST 1, 2024 – 5 AM WEATHER FORECAST

The running rainfall total is 3.02". Today features a marked improvement in the forecast, along with a renewed chance of evening thunderstorms. A different environment than yesterday should lend to pop-up showers in the region between 3 - 4 PM, increasing in strength towards sunset. Overnight tonight, the transition to a brutal pattern begins. Rainfall should occur mostly overnight and into Friday morning, stacking up quickly toward 0.50 - 0.75". The atmosphere shows no signs of quitting Friday and Saturday, with a disturbing amount of energy and moisture. Minimum amounts through Saturday night are above 0.75" ... but at least we have a sunnier Sunday to look forward to!
