enCore Energy Enters Definitive Agreement for the Sale of the Marquez-Juan Tafoya Uranium Project

DALLAS, Texas – June 6, 2023: enCore Energy Corp. (“enCore” or the “Company”) (NYSE American:EU) (TSXV:EU) announced today it has entered into a definitive agreement with Anfield Energy Inc. (“**Anfield**”) (TSX.V:AEC; OTCQB:ANLDF) whereby Anfield will acquire, from enCore, the Marquez-Juan Tafoya Uranium Project located in New Mexico in exchange for C\$5,000,000 in cash and 185,000,000 of its common shares. This is the third transaction in enCore’s ongoing program of divesting uranium assets that are not in its production pipeline.

William M. Sheriff, enCore’s Executive Chairman stated: “enCore has acquired a series of quality U.S. projects through several mergers and acquisitions at a time when there were few competitors due to the industry downturn of recent years. We are now capitalizing on those assets that do not meet our criteria for development such as early-stage projects and, in this case, an advanced project that is conventional in nature rather than In-Situ Recovery (ISR)-amenable.”

“By gaining a significant equity interest in Anfield, a company dedicated to conventional uranium development, we gain an immediate cash payment and participation as a significant shareholder in their broad portfolio of advanced projects in the southwestern United States. Anfield holds one of the very few licensed conventional uranium mills in the US making them a logical and desirable developer of the Marquez-Juan Tafoya asset. With board representation, and the right to maintain our leading shareholder position, we look forward to our involvement with Anfield as they advance this key project along with their other conventional assets,” Sheriff said.

Pursuant to the Agreement, on closing of the Transaction, enCore will have the right to one seat on the board of directors of Anfield, which will be ongoing for so long as enCore holds at least 10% of the issued shares of Anfield. enCore will have the right to maintain its percentage equity interest in Anfield in subsequent share issuances as long as it holds at least 10% of the issued shares of Anfield.

Pursuant to the agreement, Anfield will, on closing, acquire all of the issued and outstanding shares of Neutron Energy, Inc. (“**Neutron**”), a wholly-owned subsidiary of the Company (the “**Transaction**”) which holds the Marquez-Juan Tafoya Uranium Project as its sole asset.

Closing of the Transaction is anticipated to take place on or before July 21, 2023 and is subject to stock exchange approval and other customary conditions. Red Cloud Securities Inc. acted as an advisor in connection with the Transaction.

About enCore Energy Corp.

enCore Energy Corp. is committed to providing clean, reliable, and affordable domestic nuclear energy by becoming the next United States uranium producer in 2023. enCore solely utilizes In-Situ Recovery (ISR) for uranium extraction, a well-known and proven technology co-developed by the leaders at enCore Energy. In-Situ Recovery extracts uranium in a non-invasive process using natural groundwater and oxygen, coupled with a proven ion exchange process, to recover the uranium. Uranium production is planned at enCore's licensed and past-producing South Texas Rosita Processing Plant in 2023, and at its licensed and past-producing South Texas Alta Mesa Processing Plant in 2024. Future projects in enCore's production pipeline include the Dewey-Burdock project in South Dakota and the Gas Hills project in Wyoming, along with significant uranium resource endowments in New Mexico providing long term opportunities. The enCore team is led by industry experts with extensive knowledge and experience in all aspects of ISR uranium operations and the nuclear fuel cycle. enCore diligently works to realize value from other owned assets, including our proprietary uranium database that includes technical information from many past producing companies, from our various non-core assets, and by leveraging our ISR expertise in researching opportunities that support the use of this technology as applied to other metals. enCore is also committed to working with local communities and indigenous governments to create positive impact from corporate developments.

Cautionary Note Regarding Forward Looking Statements:

Certain information contained in this news release, including: statements pertaining to the Transaction, the Company and Anfield's ability to satisfy the closing conditions of the Transaction, the Company and Anfield's ability to obtain necessary approvals from the TSX Venture Exchange, any information relating to the Company being a leading uranium company; and any other statements regarding future expectations, beliefs, goals or prospects; may constitute "forward-looking information" and "forward-looking statements" within the meaning of applicable Canadian and United States securities laws and regulations (collectively, "forward-looking statements"). All statements in this news release that are not statements of historical fact (including statements containing the words "expects", "is expected", "does not expect", "plans", "anticipates", "does not anticipate", "believes", "intends", "estimates", "projects", "potential", "scheduled", "forecast", "budget" and similar expressions or variations (including negative variations) of such words and phrases, or statements that certain actions, events or results "may", "could", "would", "might" or "will" be taken) should be considered forward-looking statements. All such forward-looking statements are subject to important risk factors and uncertainties, many of which are beyond the company's ability to control or predict. Forward-looking statements necessarily involve known and unknown risks, including, without limitation, risks associated with general economic conditions; adverse industry events; future legislative and regulatory developments; the ability of enCore to implement its business strategies; and other risks. A number of important factors could cause actual results or events to differ materially from those indicated or implied by such forward-looking statements, including without limitation exploration and development risks, changes in commodity prices, access to skilled mining personnel, the results of exploration and development activities; production risks; uninsured risks; regulatory risks; defects in title; the availability of materials and equipment, timeliness of government approvals and unanticipated environmental impacts on operations; risks posed by the economic and political environments in which the Company operates and intends to operate; increased competition; assumptions regarding market trends and the expected demand and desires for the Company's products and proposed products; reliance on industry equipment manufacturers, suppliers and others; the failure to adequately protect intellectual property; the failure to adequately manage future growth; adverse market conditions, the failure to satisfy ongoing regulatory requirements and factors relating to forward looking statements listed above which include

risks as disclosed in the Company's annual information form filings. Should one or more of these risks materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described herein as intended, planned, anticipated, believed, estimated or expected. The Company assumes no obligation to update the information in this communication, except as required by law. Additional information identifying risks and uncertainties is contained in filings by the Company with the various securities commissions which are available online at www.sec.gov and www.sedar.com. Forward-looking statements are provided for the purpose of providing information about the current expectations, beliefs and plans of management. Such statements may not be appropriate for other purposes and readers should not place undue reliance on these forward-looking statements, that speak only as of the date hereof, as there can be no assurance that the plans, intentions or expectations upon which they are based will occur. Such information, although considered reasonable by management at the time of preparation, may prove to be incorrect and actual results may differ materially from those anticipated. Forward-looking statements contained in this news release are expressly qualified by this cautionary statement.
